Job Description

DataposIT Limited is a leading IT solutions integrator specializing in business applications, infrastructure, managed services, and IT consultancy services. We are dedicated to providing state-of-the-art IT solutions to our clients. As an IT solutions integrator company, we are capable of both informing and implementing complex solutions for your business- big or small. Our team is comprised of highly trained professionals whose collective IT industry knowledge makes us one of the premier IT firms in the region.

Role Brief

The Data Science internship offers a great opportunity for those coming from an academic background to get a career in data science. The candidate will work with customers across multiple sectors; applying the latest research and technology to overcome real life commercial problems using data science techniques.

We're looking for someone with a BSc/BA, who is enthusiastic to learn more about data science. We're particularly interested in those who have experience with problem solving and using a range of technical skills throughout their academic life.

During the internship, you'll get exposure to data science and how we deliver value for our customers. You'll work as part of our data science team. You'll get to learn the commercial side of data science through engagement with customers and you'll apply your technical skills to a variety of business problems.

This position requires a high degree of independence and responsibility. By the end, you should be in a position to start a full-time data science career in the commercial world.

Responsibilities;

Will include but not limited to:

Identify valuable data sources and automate collection processes

Undertake pre-processing of structured and unstructured data

Analyze large amounts of information to discover trends and patterns

Build predictive models and machine-learning algorithms

Combine models through ensemble modeling

Present information using data visualization techniques

Propose solutions and strategies to business challenges

We'd love it if you have;

A BSc/BA in a quantitative subject

Prior experience (in an academic or work setting) in any or some of – statistical/mathematical modelling, data mining, unstructured data analytics

Programming skills/concepts and the ability to pick up new technology with ease

Prior experience (in an academic or work setting) in any coding language (e.g. R, Python, Matlab, Java, C, etc.) and/or other statistical tools/languages

The ability to understand and present findings to a non-technical audience. Prior experience in data visualization and/or deriving insight from a wide variety of data sources is a plus
