Job Description

(adsbygoogle = window.adsbygoogle || []).push({});

The University of Nairobi, a body corporate established under the Universities Act of the laws of Kenya and the University of Nairobi Charter, is the pioneer institution of University education in Kenya and the region. The only institution of higher learning in Kenya for a long time, the University of Nairobi responded to the national, regional and Africa's high level manpower training needs by developing and evolving strong, diversified academic programmes and specializations in basic sciences, applied sciences, technology, humanities, social sciences and the arts.

REF AD/7/94/23, I POST

The Position

The position is domiciled in the Department of Clinical Medicine and Therapeutics in the Faculty of Health Sciencies, under the Monitor and Prevent Antimicrobial Resistance in Kenya (MAPAMR Kenya) Project. This is a five year CDC project that will be conducted in three hospitals: namely Kenyatta National Hospital, The Nairobi Hospital and The National Spinal Injury Referral Hospital.

Location

This is a full time position based at the University of Nairobi, Department of Clinical Medicine and Therapeutics, its holder reports to the Project Principal Investigator.

Duties and Resposnbilites

Database management and maintenance

Developing M&E guidelines, data collection, management and analysis protocols

Ensuring source documents are safeguarded and that optimal data quality is maintained

Tabulating program data to generate weekly and quarterly reports

Maintaining a clean log frame of data queries and how they have been resolved

Developing standard operating procedures for data management

Statistical analysis of routine project data

Resolving data queries and carrying out data trend analysis

Job Specifications

Bachelor of Science degree in Statistics, Mathematics or Biometry

Masters degree in Epidemiology or Biostatistics

Certificate in Good Clinical Practice (GCP)

At least five years of working experience in handling research health information systems

Experience in writing scientific manuscripts and writing grants

Demonstrated skills in database development with good analytical and presentation skills, excellent interpersonal and communication skills, and the ability to work under pressure and meet deadlines

Experience working on an online data entry platform will be an added advantage

Tenure and Terms of Appointment

The tenure of this job is one year, appointment is on contract which can renewed based on performance, mutual agreement and project period.
