[Apply Now](#)

Company: JobWebKenya

Location: Kenya

Category: production

Job Description

We are a Management Consultancy firm and we commenced active business in Kenya April .

About the job

Receive already punched materials for shearing from the punching station.

Check and ensure received materials are as specified in the blueprints

Set the shearing machine to the desired/specified settings before running the first programme

Operate machinery and carry out production as per provided production schedule

Measure the first part after shearing (with QC) and make sure all the specifications are met before continuing with mass production

Carry out periodic machine inspection to curb any emerging/ unforeseen issues and fix any issues found

Report machine break downs to the lead operator for scheduled maintenance

Hand over the materials to bending after the shearing process is completed

Switching off Machines After work

Stacking Material in the correct place
