Category: architecture-and-engineering

Job Description

Outrival HR Solutions & Consultancies was established to offer specialized, dedicated and focused Human Resources services to organisations of various sizes and in different industries.

It provides excellence services in Recruitment, Training, Performance Management, HR structuring, HR Policies & Procedures and HR Outsourcing services amongst others.

Outrival HR Solutions & Consultancies is registered and approved by National Industrial Training Authority (NITA) to offer a wide variety of Management and HR related trainings. Our Vision To be the Leading Firm offering Human Resources Solutions and Consultancies in Africa and Beyond. Our Mission To offer Human Resources Solutions to Enhance Organizations' Success and Efficiency. Our Passionate Values Unique Diligence Flexibility Competence

Main Purpose of the role

The Mechanical Engineer will work closely with architects and construction managers to ensure that the mechanical systems are integrated seamlessly into the building design.

One is responsible for all construction activities that relate to mechanical equipment installation and maintenance.

Duties & Responsibilities

Plan and assign mechanical related works and coordinate them ensuring they are diligently carried out to accomplish daily targets

Proper installation, test-running, maintenance and overall control of all activities related to mechanical equipment and facilities

Explain safety protocols and how to technically handle the various instruments used on-site to the other Engineers

Responsible for the planning and analysis of the aspect of the construction that involve mechanical works.

Ensure absolute compliance of suppliers in supplying the materials and machinery needed on site.

Oversee the general activities of mechanical works and structures on-site. This involves planning and assigning mechanical-related works and coordinate them to the right sector while ensuring that they are diligently carried out to accomplish their daily targets.

Give estimates, prepare and assign resources e.g. manpower, materials, equipment and consumables that will be needed for all mechanical and related works before execution of project.

Carry out and monitor the installation process of the equipment to their appropriate places, test-run to check for any faulty parts, and ensure they are used and maintained as per industry standards and recommendations.

Train employees on how to handle and care for the construction equipment.

Regular visitation to the construction site to monitor and resolve any unexpected technical difficulties that might arise during work is also expected of mechanical engineers.

Keeping records such as maintenance and repair schedule of various tasks involving installation and maintenance of machinery and equipment.

Submit site daily reports, inspection requests, estimates and all applicable reports as required.

Ensure that all projects are executed according to the applicable health, safety, sanitary and environmental standards.

Job Requirements

BSc Degree in Mechanical Engineering or equivalent

Able to train others on handling various equipment and due care necessary

Able to detect and provide necessary solutions to any problems that may arise

7 Years' proven working experience, 3 of which MUST be in Construction.

Familiarity with 2D or 3D engineering design and tools (e.g., AutoCAD, ProE or other)

Mathematical computing and analysis tools knowledge (Matlab, Excel, LabView etc)

Creativity and analytical skills

Ability to communicate technical knowledge in a clear and understandable manner

Technical writing skills

Good Moral standing embracing Christian values.
