Job Description

(adsbygoogle = window.adsbygoogle || []).push({}); Kiambaa Dairy Farmers Co-operative Society Limited was formed in the colonial era and duly registered on the 26th January as a Dairy co-operative under The Co-operative Society Rules, . The Society was formed by farmers within Kiambaa area with an objective of coming together and bulking their milk produce so as to reach better rewarding markets and have an upper hand in mobilization of resources for competitive advantage. Since then, the Society has withered difficult storms such as poor milk handling procedures, poor marketing strategies and poor management but has managed to stand tall up to the present day. During the time the Society experienced loss of market opportunities and withdrawal of members but it also experienced growth by both revenue and assets. So far it has good cooling machines and tanks, a well maintained fleet of vehicles, a reliable power back-up system (Generator) and a reliable source of water for better hygienic conditions while handling milk. It has also been able to open up animal feeds stores where its members can easily access concentrates and mineral supplements at competitive prices. The society has since started value addition strategy where it produces high quality yoghurt (Dafina) and pasteurized milk. The Society has also made significant strides in computerizing its operations and hire competent staff who are regularly trained. The Society is governed by a Board of Management which consists of 9 members while the supervisory committee has 3 members. Current the society's work force consist of 60 members of staff.

Key Responsibilities:

Grade all milk products from farmers against quality parameters.

Document all farmers rejected milk stating the reason for rejection.

Communicate any milk rejections to the Quality Control Officer.

Strive in conjunction with the management to ensure that milk produce reaches the cooling plant within 3hrs of collection from the farmers.

Communicate in a timely manner any occurrence e.g., vehicle breakdown that might lead to deterioration of milk quality.

Assist in recruitment of new farmers.

Connecting the farmers with milk quality challenges to the extension officers for assistance.

Notifying the Extension Officers of any farming issues from the farmers.

Stores management to ensure that there is a steady supply of feeds and supplements for the farmers at all times.

Key Qualifications

Certificate/Diploma in Dairy Technology and Management, an Undergraduate Degree will be added advantage.

Minimum of 1-year experience in milk grading and processing in a dairy set up.

Experience in yoghurt processing will be an added advantage

Integrity

Accountability.

Team work

Strong Communication

Good Interpersonal skills.
