

PowerShell Expert - Full-Time, Remote

[Apply Now](#)

Company: M365Connect

Location: Nairobi

Category: other-general

Role Overview:

We are a Microsoft Services Provider facing limitations when it comes to internal scripting knowledge. The creation of Scripts inside the Microsoft Environment (Online as well as OnPrem) especially in the Microsoft Exchange is crucially important. Accordingly, we need someone who is handling this part on behalf of our team members as well as teaches them PowerShell on-the-go while working together on those scripts as basic knowledge is given and needs to get elevated to advanced knowledge. This role combines technical support with educational mentorship, offering the successful candidate an opportunity to significantly impact our operational efficiency and technical acumen in a long term fully remote environment with flexible working hours. This role requires the candidate to work fulltime but can get started part time as well. However full-time available applicants will get preferred.

Key Responsibilities:

Having basic knowledge in managing and troubleshooting Microsoft environments.

Having expert knowledge in developing, testing, implementing/processing, and optimizing PowerShell scripts to automate scheduled tasks (for example Security Update on Exchange Server), enhance system functionality, and improve operational efficiency.

Conduct personalized training sessions to teach PowerShell to team members, adapting content to meet varying levels of expertise. No learning material is required! We will learn on the go while creating/adjusting the Scripts together and during the transfer of a script.

Collaborate closely with IT and recruitment teams to understand their automation needs and develop solutions to streamline processes.

Assist in the documentation of scripts and system configurations.

Skills & Qualifications:

Proven expertise in PowerShell scripting, with a portfolio of scripts or projects to demonstrate skills.

Basic Knowledge of Microsoft Windows Server as well as M365 Capabilities including Azure (Runbooks automation for example)

Experience in teaching or mentoring individuals in technical subjects, preferably PowerShell.

Strong problem-solving skills and the ability to work collaboratively in a remote team environment.

Excellent communication skills, with the ability to translate complex technical concepts into understandable terms for non-technical team members.

Fluent in English, with any additional language skills being a bonus.

Passion for continuous learning and sharing knowledge with others.

Why Join Us?

At M365Connect, you will be part of a visionary team dedicated to excellence in IT recruitment and technological innovation. This role offers the unique opportunity to shape our internal capabilities while fostering a culture of learning and improvement. Enjoy the flexibility of remote work, a supportive team environment, and the chance to make a tangible impact on our operations and expertise.

How to Apply:

Please submit your CV, a cover letter expressing your interest in this position, and examples of PowerShell scripts or projects you've worked on by clicking on apply. We're excited to explore how your expertise can drive our mission forward.
