Job Description

(adsbygoogle = window.adsbygoogle || []).push({});

We are tech powered Employee Outsourcing firm that leverages the right tools bringing the right workforce to your business

Duties & Responsibilities

Estimate requirements for Manpower, duration, tools, and consumables

Assist manager planning to prepare a construction schedule

Identify bottlenecks and troubleshoot technical issues arising during

construction in consultation with the Technical/Project manager.

Capture changes during the construction stage and report back to the design department.

Review the drawings and ensure correctness before the start of fabrication.

Manage the foreman and people in the project to make sure targets are met.

Report back daily progress to the project manager.

Plan daily production activities, consumable requirements, and manpower

Plan and inform the logistics department/coordinators on material movement, crane requirements, etc. well in advance.

Report any shortages in drawing, material, or labor consumables affecting the production progress

Asses the overtime requirement and request accordingly

Conduct daily Toolbox talks with the team.

Coordinate with other departments to avoid any clash of activities.

Plan for material in advance and follow up with coordinators for the material.

Training of people in reading drawings, marking, new fabrication

techniques, and shipbuilding standards and thereby developing local skills.

Ensure overall production quality is maintained as per IACS standard

Implement innovative methods and techniques in production

Team building

Identify the strengths and weaknesses of the team and take necessary corrective actions to improve.

Ensure all safety practices are followed during project execution

Encourage the team members and support them to achieve the targets

Responsible for managing the project's local store.

Ensure housekeeping is followed at the worksite

Coordinate launching activities

Involve in sea trials

Requirements

Diploma in Mechanical Engineering

Hands-on experience – 8-10 years in executing shipbuilding projects

for both steel and aluminum on the shop floor.

Knowledge and proficiency in MS Office products

Knowledge of rules and regulations and practices in the shipbuilding industry

Knowledge of ship construction in both steel and aluminum

Communication Skills in English both reading and writing

Ability to lead a team independently from the start to completion of the project
