```

**Salary** : Competitive based on experience and competence

Our client is a technology company in Nyeri specializing in software development, business process automation as well as digitization among other services. It offers scalable remote software engineers to businesses mainly in the USA enabling them to scale their IT workforce and avoid costly onboarding and common pitfalls offshore IT services often bring. In order to serve their clients better, they seek to hire **Senior Full Stack Developers** (on a rolling basis) to join their dynamic team.

### Key Responsibilities

Write code leveraging language features / framework features

General understanding of system architecture and tiered development

Maintain coding standards and participate in peer code reviews

Use multiple tools to help debug / troubleshoot issues

Ensure software is well tested including implementation of unit and integration tests

Create solutions to business problems

Use analysis and critical thinking skills to determine the best approach to a software solution

## Required Qualifications, Skills, Competencies & Abilities

Bachelor's Degree in Computer Science or related field

At least 3+ years' experience in software development

Proficient in 1 or many of the following: JavaScript, Java, Python, Node.js, .NET, Angular, React, Express, SQL

Understand database features: Model relational database schemas to support business requirements  
Author SQL statement for CRUD operations  
Debug and analyze SQL Statement for optimization

Experience working with source code repositories

Understand cloud services and implementation

Exposure to the Agile and Scrum development methodologies

Exemplary communication (written, oral) and interpersonal skills

Excellent coding abilities to work on numerous parts of a system or application at the same time while being accurate and thorough

Critical thinking to identify risks and enhance problem solving

Strong analytical, problem-solving skills and attention to detail

Ability to offer support to clients in the USA

Flexibility to adjust to clients changing requests

Ability to learn quickly and work independently or as part of a team

Willingness to work on-site in Nyeri
