Senior Software Engineer

Apply Now

Company: Microsoft

Location: Nairobi

Category: computer-and-mathematical

Overview

Azure Active Directory (Azure AD) is at the center of Microsoft's cloud strategy. We build and operate critical authentication, authorization and directory services that are used by the millions of Azure, Office 365, XBOX and Windows users worldwide. In the mobile-first cloud-first world, sign-in and sign-up is the front door for reliable end user experience to use any of Microsoft cloud services.

Azure AD hosts millions of tenants and billions of identities. It serves billions of requests per day in the stacks powering core authentication and programmability. The backend directory store is at the heart of Azure AD architecture. Our team is evolving the directory store platform to address the needs for the next decade. You will have an opportunity to work on the latest technologies in storage and distributed systems and apply innovative algorithms for solving problems at scale and high performance.

Our culture promotes diversity, multiculturalism, and inclusion and is clearly reflected in all the things we do. Our team has a strong sense of accountability and provides its members with many opportunities for learning and career growth. We have exciting opportunities for you to innovate, influence, transform, inspire, and grow within our organization and we encourage you to apply to learn more!

#MSFTSecurity

Qualifications

Required:

Bachelor's degree in computer science, Computer Information Systems, Math or relevant

engineering field

6+ years of professional software engineering experience, using one or more general purpose programming languages including but not limited to: Java, C/C++, C#, Python, JavaScript

Ability to work as part of geo-distributed group.

Preferred:

Experience developing server applications using Windows APIs and frameworks.
