We take pride in our highly qualified professionals who deliver our mission every day, translating their knowledge and expertise to internationally compliant practices in healthcare provision.

REF: TNH/HRD/SA/07/

ABOUT JOB

The role of the Systems Administrator is to establish and maintain integrity of work products using configuration identification, configuration control, configuration status accounting and configuration audits of the hospital information systems in order to ensure they are running optimally to support the hospital's technology requirements.

ROLES AND RESPONSIBILITIES:

Reporting to the Senior Systems Administrator, the candidate shall be responsible for the following tasks amongst others:-

Ensure the availability, performance and evolution of the Hospital's ICT systems, including the Hospital Information Management system;

Maintain and improve the system environments – including Databases and Operating Systems of the Hospital's business systems;

Analyse, document and propose solutions for Hospital wide business areas and preparation of both technical and functional specifications (TSS & FSS);

Manage, support, administer, maintain, improve and optimize the ICT environment of the core Hospital information system and other business systems, including the hosting operating system and database;

System optimization through system monitoring, analysis and development in order to ensure that the various managed and supported systems provides the requisite functionality required by business;

Provide ICT support to the Hospital Information Systems and other Business systems by providing technical assistance, analysis and solutions to issues reported or escalated from the service desk and the Daily COB (Close of Business) activities are performed across all Hospital Information Systems platforms as per the documented procedures;

Ensure proper working of live system without interrupting any services to end users;

Support and monitor users' activity under Hospital Information Systems;

Perform day to day operations and processes to support smooth business operation under the Hospital Information Systems;

Complete tasks, related to Closing of Business (COB including Pre-COB, Post-COB and backup/restoration procedures) and report accordingly;

Participate in implementation of IT projects;

Learn, understand and implement/execute new solutions; and

Any other responsibilities that may be assigned to the job holder by the supervisor from time to time.

Working relationships

Internal Relationships: Nursing, Medical Services, Supply Chain, Legal, Internal Audit,

Risk and Compliance, Operations, Catering, Human Resources and other user departments, OPCs.

External Relationships: Vendors of IT hardware.

REQUIREMENTS

Knowledge, experience and qualifications required

Bachelor of Science degree in Computer Science, Information Technology or any other related field from a recognized institution.

Certification in Database Management

Minimum of 5 years' ICT experience with 3 years at a supervisory level.

Competencies

Technical & Behavioural competencies

Thorough knowledge of Oracle and UNIX.

Proven experience in supporting a core software application.
