

## Warehouse Team Leader at Opibus (Roam)

[Apply Now](#)

Company: JobWebKenya

Location: Kenya

Category: transportation-and-material-moving

### Job Description

(adsbygoogle = window.adsbygoogle || []).push({});

The Beginning Roam was founded in just as electric mobility was taking off, when electric cars were just arriving on our streets. Roam vision is to make electric transport more accessible to a broader market by making the technology more cost efficient and simplifying deployment. The company focuses on all-electric conversion kits for fleet vehicles such as light trucks, public transport and buses, as well as electric motorcycles and energy systems. These focus areas have been chosen to maximize impact, as these vehicles are some of the highest CO2 emitting vehicles on the market and are largely an untapped opportunity.

### Summary

We are looking for Warehouse Team Lead, who will be responsible for ensuring the following core responsibilities:

#### Key Duties and responsibilities:

Strict enforcement of “no scan – no move policy” without exceptions

In peak workload scenarios, helping out with the fulfillment of picks, putaways, movements, and shipments (sales order fulfillment) according to the relevant and current SOPs

Enforcing agreed-upon (fixed) working hours and break schedules with the team members

Scheduling and distributing task execution based on operational workload and demand among the team members – execute putaways, picking, movement, counts

Train and ensure adherence to current SOPs, as well as develop them further in alignment with the operational needs of the organization

Identify and raise operational issues in the intralogistics operations meeting, as well as suggest mitigation measures and solutions

Implement and track the effectiveness of applied solutions

Adherence to and tracking of defined warehouse/intralogistics KPIs

Regular reporting on your KPIs as well as operational challenges, solutions, measures etc.

Your highest guiding principle is that every material movement and interaction is guided by the ERP/WMS.

Always ensuring the highest level of stock correctness possible (%).

### **Qualifications**

Bachelor's degree

Proven experience working in a automated warehouse

Proven experience in team leadership

Must have a keen eye to detail

Familiarity with safety procedures to ensure a safe working microenvironment, including handling equipment safely, wearing personal protective equipment (PPE), and properly handling hazardous materials.
