Company: JobWebKenya

Location: Kenya

Category: other-general

### Job Description

We are tech powered Employee Outsourcing firm that leverages the right tools bringing the right workforce to your business

### Duties & Responsibilities

To lead and perform welding activities for shipbuilding projects & provide welding assistance for ship repair projects.

Development and evaluation of welding procedures for both steel and aluminium shipbuilding and ship repair projects.

Liaise with internal departments (Production, QC/QA, etc.) to enforce and maintain welding process control.

Review drawings and ensure correctness before the start of fabrication and welding.

Training people in reading drawings, marking, welding techniques, and shipbuilding standards, thereby developing local skills.

Execute MIG and TIG weld for steel, aluminium and stainless steel components based on the drawings, welding schedule or specifications.

Work with supervisors and foremen on the projects to task plan efficient, and productive welding activities.

Provide welding engineering guidance and support structural and piping areas for shipbuilding

projects.

Ensure work is done safely and meets the HSE standards of the company.

Estimate requirements for manpower, duration, tools and consumables for welding activities.

Assist manager planning to prepare construction schedule for the shipbuilding projects.

Organizing meetings and training sessions as and when the need arises including mentorship of junior welders.

Identify bottlenecks and troubleshoot technical issues arising during construction in consultation with the construction engineer and technical manager.

Capture the changes during construction and report to the design department.

Plan daily production activities, consumable requirements and manpower.

Lead the welding team to make sure targets are met & report back daily progress to the project supervisor/ project manager.

Report any deficiencies in drawings, materials, and labour consumables which stop the production progress.

Asses the overtime requirement and request accordingly to meet the projection schedule.

Coordinate with other departments to avoid any clash of activities.

Plan for material in advance and follow up with coordinators for the material.

Ensure overall production quality is maintained as per IACS standards.

Implement innovative methods and techniques in welding and production activities.

Identify the strengths and weaknesses of the team and take necessary corrective actions to improve.

Ensure housekeeping is followed at the worksite

Prepare welding methodology in consultation with the technical Manager/GM shipyard for new builds.

Overall maintenance of welding machines

Ensure correct spares and consumables are available for the machines

Ensure X-rays and Other NDT standards are met.

### **Requirements**

Diploma / ITI

More than 10 years of welding experience in shipbuilding & ship repair.

Hands-on experience in executing welding and fabrication activities for both steel and aluminium hulls as well as outfitting on the shop floor.

Certified by AWS/IACS Members for SMAW, FCAW, SAW, GTAW and Aluminium welding.

Knowledge of rules and regulations and practices in the shipbuilding industry

Knowledge in ship construction in both Steel and aluminium

Communication Skills in English both reading and writing

Experience as a welder Foreman in reputed shipyards.

Ability to lead a team independently from the start to completion of the project

Knowledge and proficiency in MS Office products
